

## THE SPATIAL EXTENT OF RIGHTS IN LAND

### Legal Land Information in Context

This e-Monograph by Izaak de Rijcke is a collection of articles compiled around a central theme: the interplay between the nature of legal interests and the ability to represent their 3-dimensional spatial extent. The nature of these modern interests calls for a re-think of how they are displayed. How we understand them may, in part, affect how we represent their spatial extent.

Go to [4pointlearning.ca](http://4pointlearning.ca) to register (click [here](#) for registration instructions). The cost is \$35 plus HST for 1-week access to download the e-Monograph. Contact [info@4pointlearning.ca](mailto:info@4pointlearning.ca) if you have questions.
